TELETASK CLOUD CONNECTION MADE SIMPLE AND SAFE

TELETASK offers a powerful cloud-solution for the simple integration of your mobile devices via a safe TLS connection. This solution offers the possibility to manage your house from all over the world. The major advantage of this integration is that it is both easy and safe.

How does it work exactly? The TELETASK system in your house maintains a permanent and encrypted connection to the TELETASK Cloud service. Your mobile devices will connect automatically.

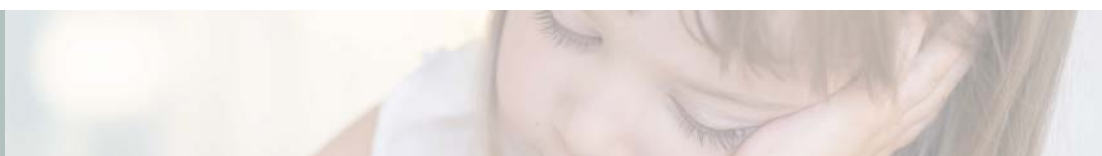

But there is more... a secure remote technical support is possible thanks to the TELETASK Cloud services (V2)! Extra services make it possible to introduce a

range of enhancements to existing features, but it also offers a variety of fun and interesting novelties for both the system integrator and the end user. TELETASK Cloud is ready to grow with your needs!

SECURITY

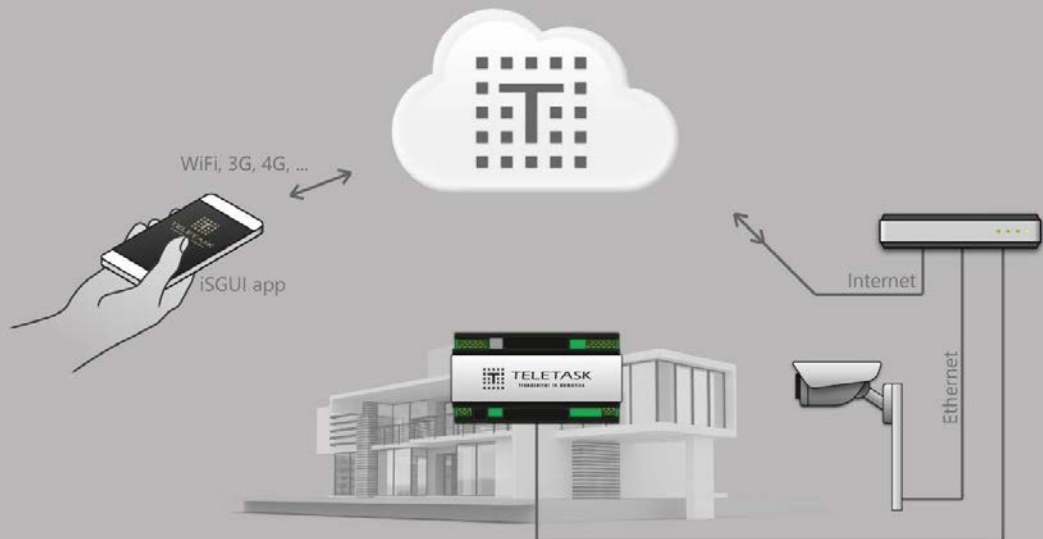

The TELETASK systems communicate with mobile devices, such as smartphones and tablets, via the internet of things using the "TLS" (Transport Layer Security) connection, known from 'https' which you also find with online banking.

The TELETASK Cloud uses a 2048 bit DIGICERT certificate with strong encryption and authentication.
