ATMOS app for mobile devices and PC

The ATMOS app provides the ability to access your integrated TELETASK functions from a smartphone, tablet (Android, iOS) and PC (Windows). For example, to visualize and control lighting, heating/cooling, doors, gates, curtains, shades, audio, wall sockets, cameras etc.

To use the ATMOS app, you need an ATMOS online subscription which you can purchase at www.teletask.be / "TTecomm".

APPLICATION

Remote (and local) control of all integrated home/building automation functions from your mobile device. One app for all! With one ATMOS software subscription, up to 5 simultaneous connections can be established.

SYSTEM REQUIREMENTS

Minimum screen resolution: 480x640.

iOS:

iOS 14 or higher

Android Smartphone or tablet

Android™ 8.0 or higher

Windows PC

Microsoft Windows 10 or higher

Camera visualization

Supports MPEG4 IP cameras.

SETTINGS

Configuration

Automatic configuration based on rooms and icons in PROSOFT. For large projects, the building can be divided in Sections for ease of use.

The ATMOS app connects via the internet to the TELETASK Cloud, which offers a secured connection with your home.

ATMOS can also connect and be used 'local' via Wi-Fi.

The configuration software PROSOFT will copy all the rooms & their functionalities to your app screens. No extra configuration is needed, but if desired, manual changes, like ordering and limiting of rooms and functions are possible.

INSTALLATION

Use GUIISOFT (PROSOFT Suite 4.0.1 software or higher).

For detailed information on how to prepare and install ATMOS, see the on-line Technical handbook on www.teletask.be – in the Professional menu.

RENEWABLE SUBSCRIPTION

You can buy an ATMOS subscription via your system integrator. You can purchase a subscription for 1, 3, 5 or ten years. After this period TTecomm can automatically renew it if the linked credit card is still valid.

iSGUI activation year	Transition program for iSGUI owners to ATMOS
2023	+4 year free subscription (paid subscription from 01/01/2028)
2022	+3 year free subscription (buy subscription from 01/01/2027)
2021	+2 year free subscription (buy subscription from 01/01/2026)
2020	+1 year free subscription (buy subscription from 01/01/2025)
2019	free subscription until 31/12/2023 (buy subscription from 01/01/2024)
2018 or older	Buy an ATMOS subscription

Test mode

Test mode available during maximum 3 days.

Demo mode

Press the 'Demo' button on first launch to control a compact TELETASK demo house.

CONNECTIONS

Mobile access or Wi-Fi

TELETASK Cloud

TELETASK offers a powerful cloud solution for the simple integration of mobile devices via a highly protected connection. The major advantage of this integration compared with VPN is that it is both simple to setup, it is highly secured and it doesn't need any maintenance. You only need your TTcloud account credentials.

Local access (only Wi-Fi)

The ATMOS can connect through your LAN (local area network) with the central unit by entering the IP address. The central unit itself should be added to TTcloud and a regular connection from the central unit to the cloud is necessary to update the subscriptions locally (a permanent internet connection of the central unit is recommended.)
