Google Home supports Dutch, English, French, German, Italian, Portuguese (Brazilian), Spanish, …

VOICE CONTROL
PROVIDE YOUR SMART ASSISTANTS WITH THE TELETASK VOICE SKILLS

When using Alexa for your TELETASK home automation - the following languages are supported at the moment (2020): Italian (IT), German (DE), English (US), English (CA), English (IN), Spanish (ES), Spanish (US), English (AU), French (FR), French (CA), English (UK)

Many TELETASK customers like to control their house/building by voice. After an extended test period in 2018/2019 and certification by Amazon and Google, the TELETASK skills for Amazon Echo and Google Home smart assistants came online.

You can use one or more smart assistants in your house/apartment, connected via WiFi. The WiFi router(s) need(s) to be connected to the LAN on which the TDS installation is connected. You only need (a) TELETASK DoIP central unit(s), an internet connection, the Voice Control TSF16120 subscription and some configuration in PROSOFT. You can connect your smart assistant via the Amazon or Google Home app on your mobile device first. Then you can easily provide your smart assistant(s) with the TELETASK voice skills.

SOME USAGE EXAMPLES
"Alexa, activate the bathroom light'.

"Alexa, activate diner mood".

"Hey Google, activate wake-up mood".

"Alexa, set bathroom temperature to 21 degrees".

"Hey Google, dim the night hall lights to 30 percent", "close the shades"…. You name it.

HOW TO OBTAIN A TSF16120 SUBSCRIPTION
The TSF16120 subscription can be ordered by the System Integrator online in TTecomm and will be activated for use immediately.

See more details in the Technical Handbook on how a system integrator can obtain and activate Voice Control for one or more TDS installations.

Go to www.teletask.be , select TTecomm and login (for system integrators with a credit card activated account).

CONDITIONS
- For all DoIP central units which are TTcloud connected.

- PROSOFT V3.7.3 or higher

Available: December 2019.

WHAT IS TTECOMM
TTecomm is the online e-commerce site where system integrators can buy TELETASK-TSF subscriptions. TSF services are SaaS- model based software subscriptions available at a yearly fee. There is no basic license like for traditional software. A subscription can be obtained per year and the auto renewal can be stopped at any time by the system integrator (in TTecomm).

SYSTEM INTEGRATOR TECHNICAL INFORMATION
You can find a full instruction about this subject in the online technical handbook at www. teletask.be professional – Technical handbook.

Available: Available on TTecomm and fully operational immediately after payment.

Auto renewal (yearly): In order to be able to make an automatic yearly renewal (and invoice by e-mail), the system integrator account only works with credits cards: VISA and Master Card. TTecomm will ask your company- and credit card information at first login.

If the system integrator doesn't stop the renewal, the subscription will be automatically renewed every year. He will receive an e-mail notification two months before the renewal date. So he still has one month to decide to stop the auto renewal or not. Payment will be taken from the SI's account- credit card, one month before the renewal date (!). If the credit card is not valid at that moment, the TTecomm platform will keep the system integrator posted to add a valid credit card in his account on TTecomm. He still has one month to do so to avoid that the TSF service stops working (at the planned renewal date).
