

**Control board for 48 relays**
**TDS10120**

Relay extension board for the PROJECT central unit. By mounting one or up to two of these expansion cards, the standard nr. of 48 relays, can be extended from 48 to 2x48 or 3x48 outputs for OUT08x relay modules. If two extra boards are mounted the total relay outputs become 144 (without the relay interfaces which can be connected on AUTOBUS)

|                           |   |   |
|---------------------------|---|---|
| <b>Application:</b>       | To extend the # of relay outputs of the PROJECT unit.   |   |
| <b>Characteristics:</b>   | 6x Sub-D connector to connect dedicated cable (mostly ref. TDS90103) to 6 OUT08x output modules.  |   |
| <b>Settings:</b>          | None  |   |
| <b>Installation:</b>      | To be mounted in the PROJECT central unit. If ordered together with the PROJECT central unit, the optional boards are pre-installed in the factory..                                  |   |
| <b>Connections:</b>       | Connections to the central unit boards, by flatcable and power connector.<br>To the external output modules, you will need to order the dedicated special output cable, ref. TDS9010x |   |
| <b>Dimensions:</b>        | Dimensions  | Width: 95; Height: 260; Depth: 15 (in mm) |
|                           | Weight  | 0,850 kg                                  |
